

## Connect the iShare E receiver box to your interactive display or TV

- ① Earphone
- ② LAN
- ③ HDMI interface
- ④ USB interface
- ⑤ TF
- ⑥ USB interface
- ⑦ DC Power Jack
- ⑧ Reset

## Screen share via dongles

Step 1: Insert iShare E dongle into the USB port of the receiver box.

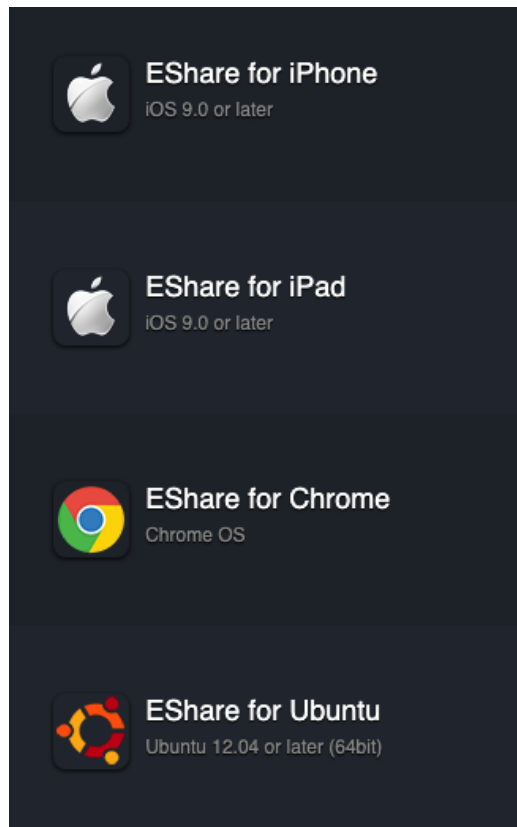

Step 2: Pairing will auto start and complete in a few seconds. The blue light will start to blink and when blinking stops, plug out the dongle.

Step 3: Now insert the iShare E dongle into the USB port of your PC. The blue light will start to blink and when blinking stops, press the button on the dongle to cast your screen.

## Screen share via EShare software

### Download the EShare software

Scan QR code on the guide screen or download on visit [eshare.app](https://eshare.app) (<https://eshare.app/#once>) from web browser to download.

## About EShare

EShare is a set of multi-screen interactive software designed for sharing, wireless display and remote control between mobile devices (such as phones, tablets, laptops, etc.) and Interactive Touchscreen/TVs.

## Main Features

- File sharing: share any file (such as audio, video, photo, office document, PDF, e-book, APK, etc.) from mobile phone or tablet to Interactive Touchscreen/TVs.
- Remote control: supports wireless control via wireless mouse, air mouse,

keyboard, touchpad and remote controller, etc.

Wireless camera and microphone: share the images or audio from phone camera or microphone to Interactive Touchscreen/TVs in real time.

TV mirror: mirror the Interactive Touch-

screen/TV screen to the client device, and control the Interactive Touchscreen/TV via the client device.

- **Mirroring:** mirror client device screen (such as iPhone, iPad, Android device, MacBook, Chromebook and Windows PC, etc.) to Interactive Touchscreen/TV or projector, and touch to control client devices from Interactive Touchscreen/TV

without touch control cable, VGA or HDMI.

- **AirPlay:** share images, audio, videos of iPhone, iPad or iPod touch to Interactive Touchscreen/TV.
  - **DLNA:** supports DMR and any App compatible with the DLNA protocol.
  - **Wireless annotations:** annotate the Interactive Touchscreen/TV via phone in real time on TV mirror function.
  - **Multi screens (4 screens):** cast multi device screens to Interactive Touchscreen/TV, and the screen of Interactive Touchscreen/TV will be split automatically.
  - **Display group:** connect the client device to the main Interactive Touchscreen/TV, enable Mirroring, and then cast the screen of main Interactive Touchscreen/TV to multiple Interactive Touchscreen/TVs.
-

# Function List

<b>Video</b>	All video formats
<b>Audio</b>	All audio formats)
<b>Images</b>	Share images
	Real-time scaling
	Rotate
<b>Documents</b>	PDF
	E-books and others
	All Office documents
<b>Remote control</b>	Wireless mouse
	Air mouse
	Wireless keyboard (supporting the input methods of voice, hand-writing...)
	Wireless touchpad
	Common keys (Home, Menu, Back, Vol+/-, etc.)
	Application list of Interactive Touchscreen/TV
<b>Camera</b>	Wireless camera
<b>Wireless annotations</b>	Annotate the Interactive Touchscreen/TV screen via phone in real time

<b>iOS mirroring</b>	Mirror iOS screen to Interactive Touchscreen/TV
<b>Android mirroring</b>	Mirror Android device screen to Interactive Touchscreen/TV, and support the function of wireless annotations
<b>Windows mirroring</b>	Mirror Windows PC screen to Interactive Touchscreen/TV, and touch feedback from Interactive Touchscreen/TV to Windows PC
<b>Mac mirroring</b>	Mirror Macbook screen to Interactive Touchscreen/TV, and touch feedback from Interactive Touchscreen/TV to Macbook
<b>Chrome mirroring</b>	Mirror Chromebook screen to Interactive Touchscreen/TV
<b>DLNA</b>	Supports any App compatible with DLNA protocol
<b>Multi screens</b>	Cast 4 device screens to Interactive Touchscreen/TV, and the screen of Interactive Touchscreen/TV will be split automatically
<b>Display group</b>	Cast the screen of home Interactive Touchscreen/TV to multiple Interactive Touchscreen/TVs

# Client Requirements

Please ensure the client meets the following requirements:

- Android 5.0 or later
- Mac OS 10.9 or later
- iOS 9.0 or later
- Windows 7/8/10
- Chrome OS

# Network Requirements

## **EShare Server (iShare E receiver)**

- Please ensure that *EShare Server* or *iShare E receiver box* and *EShare App* are at the same network.
- TCP Ports: 56789, 25123, 8121 & 8000
- UDP Ports: 48689, 25123
- DNS: h1.ee-share.com
- Please enable Wi-Fi router broadcast function.
- For your great user experience, it is strongly recommended to connect the IFPP to Ethernet and connect the client device to 5GHZ Wi-Fi band.

## **Airplay / iMirror**

- Please ensure that MDNS of network/AP/router (if possible) is enabled.
- TCP Ports: 51040, 51030, 51020 & 51010
- UDP Ports: 5353 (MDNS to broadcast Airplay)

# Using EShare

## First Launch

Please ensure that your client device and iShare E receiver Box are connected at the same network.

Next, scan QR code or visit the website to download and install the EShare App to your device.

The image shows a dark blue interface for EShare-4695. At the top left, it says "EShare - Enjoy Sharing Life". The main title is "EShare-4695". Below this, there are three main steps in rounded rectangular boxes, connected by double right-pointing arrows (>>>).

- Install:** Features a cloud download icon. Text: "Visit [eshare.app](https://eshare.app) or scan QR-Code". Below this is a QR code with "Click to enlarge" underneath. At the bottom, it lists "Supported devices: iPhone/iPad/Android/Windows/macOS/Chrome OS".
- Configuration:** Features a gear icon. Text: "Ensure that all devices are connected to the same network". Below this, it says "<Ethernet>" and "IP: 192.168.0.42".
- Connect:** Features a monitor icon. Text: "Launch EShare" and "select EShare-4695".

At the bottom of the interface, there is a tagline: "Make the user experience natural and enjoyable for business presentation, educational training and home entertainment." and two icons: a monitor and a gear.

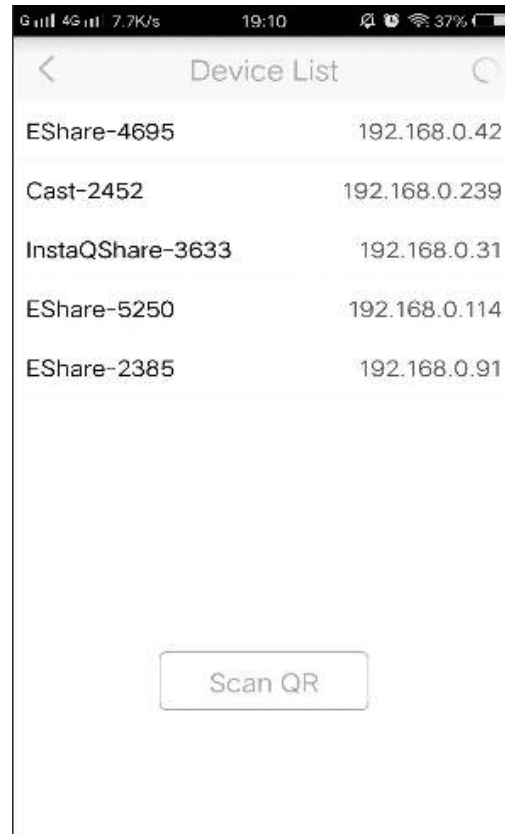

# Android

## Connect To Interactive Touchscreen/TV/ iShare E

Firstly ensure that your Android device and Interactive Touchscreen/TV/ iShare E are connected at the same network.

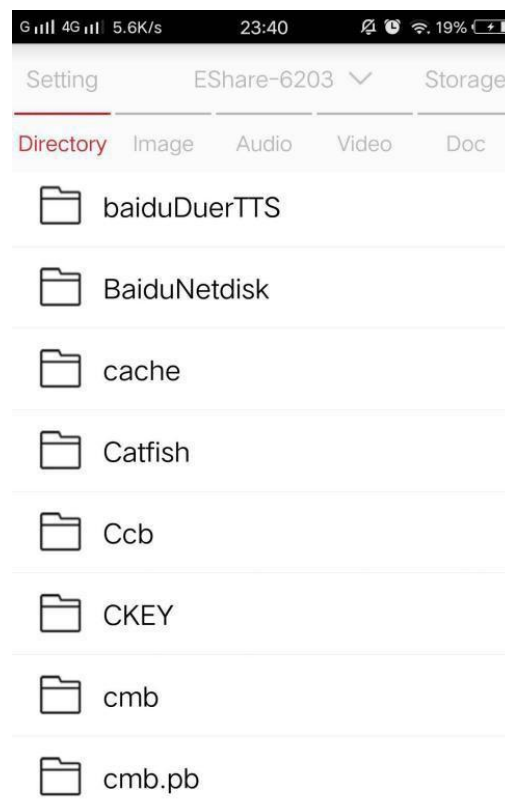

Then launch the *EShare App* on the phone, and *EShare* will automatically find the Interactive Touchscreen/TV/iShare E name(s) connected on the same network with the *EShare Server App*.

Next, click the device name you plan to connect to, and the client device will be connected to Touchscreen/TV/iShare E. Or you can click "Scan QR" and scan the QR shown on the Touchscreen/TV/ iShare E.

## File Sharing

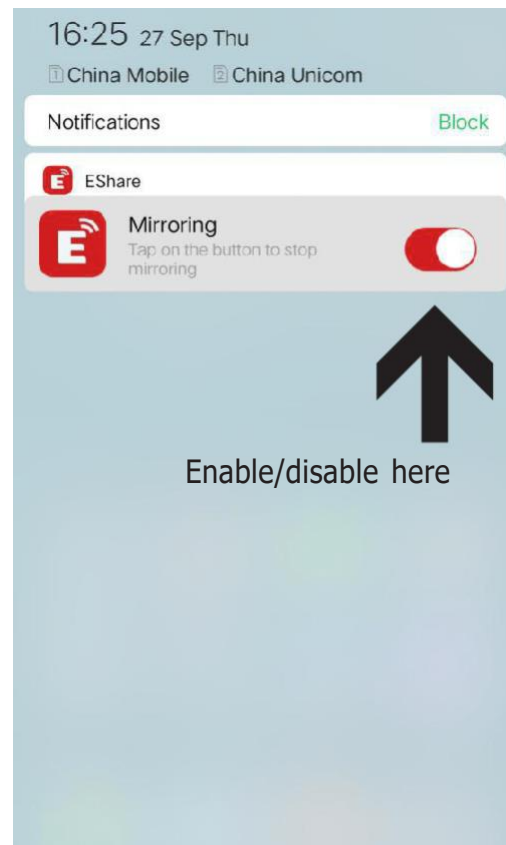

Share any file (such as audio, video, picture, office document, PDF, e-book, APK, etc.) from mobile phone or tablet to Interactive Touchscreen/TV/ iShare E.

# Android (continued)

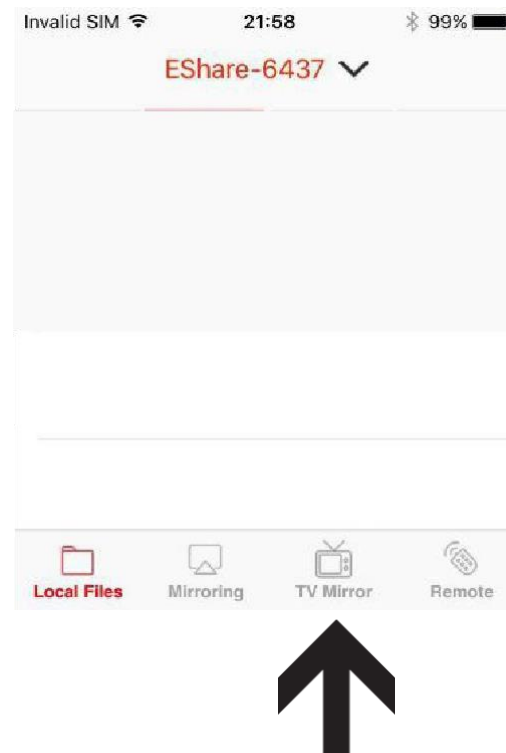

## Mirroring

On your phone (*EShare App*) touch *Mirroring* to cast the Android device screen to Interactive Touchscreen/TV/ iShare E.

## TV Mirror

On your phone (*EShare App*) touch *TV Mirror* to mirror the Interactive Touchscreen/TV screen to phone, and then touch the phone to control Interactive Touchscreen/TV.

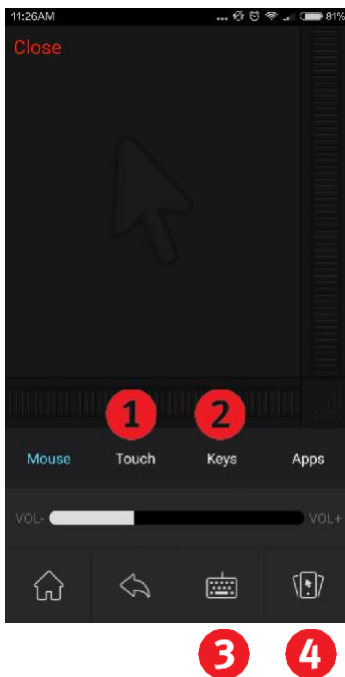

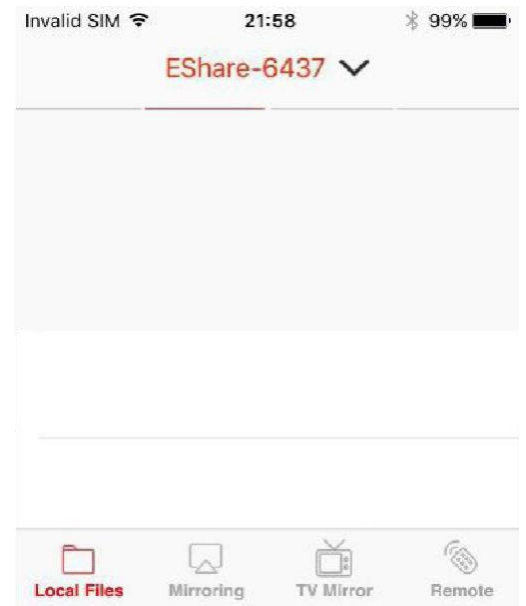

# Android (continued)

## Remote Control

On your phone (*EShare App*) touch *Remote* to act your phone as wireless mouse, remote controller, keyboard, *air mouse* etc.

# Android (continued)

## Camera

On your phone use the *Camera* or *Photos* or *Microphone* App (select *EShare*) to share the images or audio from phone camera or microphone to the Interactive Touchscreen/TV in real time.

## File Sharing

Open other Apps and share files to the Interactive Touchscreen/TV via *EShare*.

# iOS

## Connect To Interactive Touchscreen/TV

Firstly ensure that your iOS device and Interactive Touchscreen/TV are connected at the same network.

Then launch the *EShare App* on your iOS device, and it will automatically find the Interactive Touchscreen/TV name(s) connected on the same network with *EShare*.

Next, click the device name you plan to connect to, and the client device will be connected to Touchscreen/TV. Or you can click "Scan QR" and scan the QR shown on the Touchscreen/TV.

## File Sharing

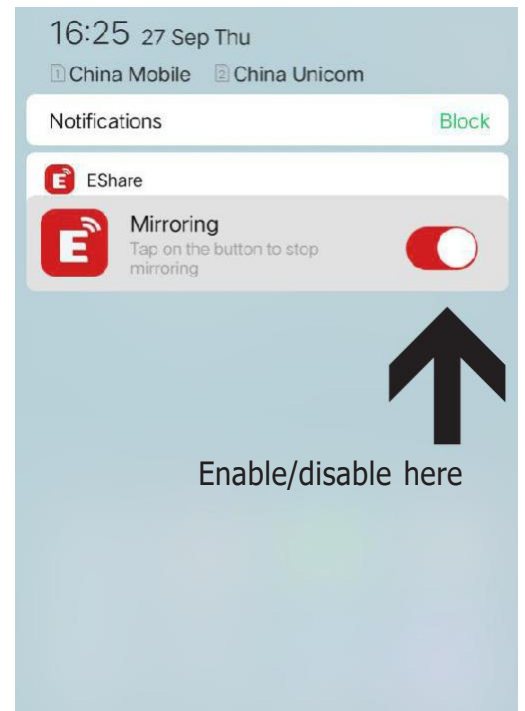

Share any file (such as audio, video, picture, office document, PDF, e-book, etc.) from your iOS device to the Interactive Touchscreen/TV.

# iOS (continued)

## Mirroring

On your iOS device (*EShare App*) touch *Mirroring* to cast the device screen to the Interactive Touchscreen/TV.

## TV Mirror

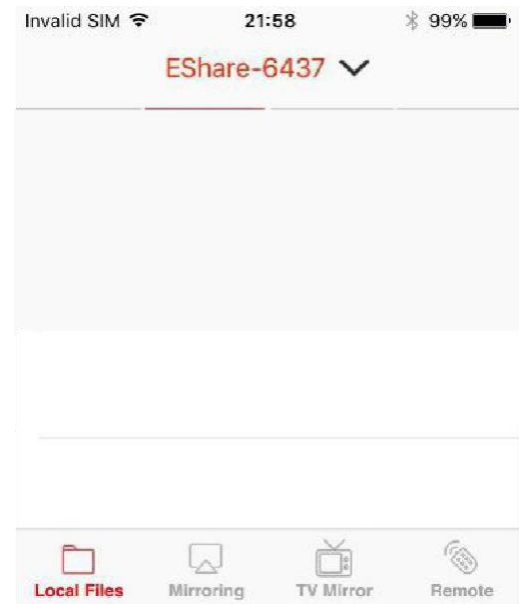

On your iOS device (*EShare App*) touch *TV Mirror* to mirror the Interactive Touchscreen/TV screen to iOS device, and then you can control Interactive Touchscreen/TV from your device.

# iOS (continued)

## Remote Control

On your iOS device (*EShare App*) touch *Remote* to act your device as wireless mouse, remote controller, keyboard, *air mouse* etc.

## File Sharing

Open other Apps and share files to an Interactive Touchscreen/TV via *EShare*.

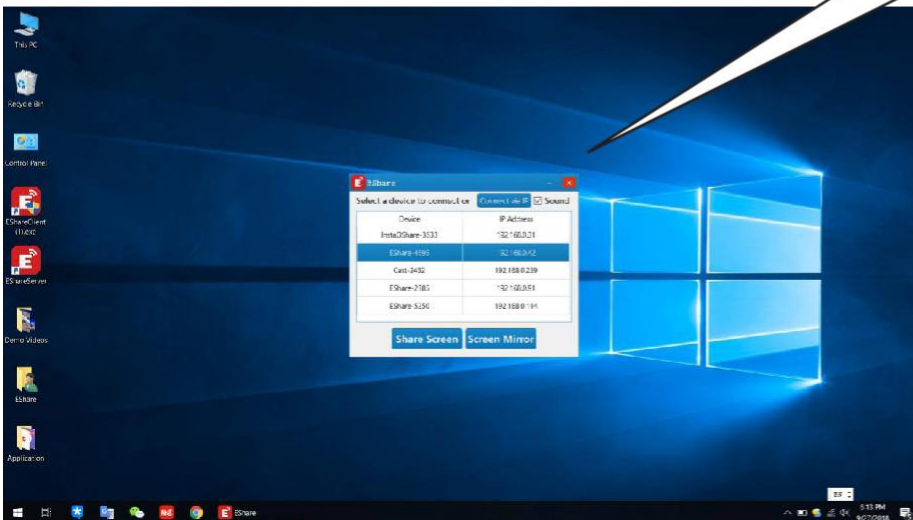

# Guide for Windows/Mac Computers

## Mirroring

Ensure that your Windows/Mac computer and the Interactive Touchscreen/TV are connected to the same network.

Launch the *EShare App*, and it will automatically find Interactive Touchscreen/TV device names connected to the same network as the *EShare Server*.

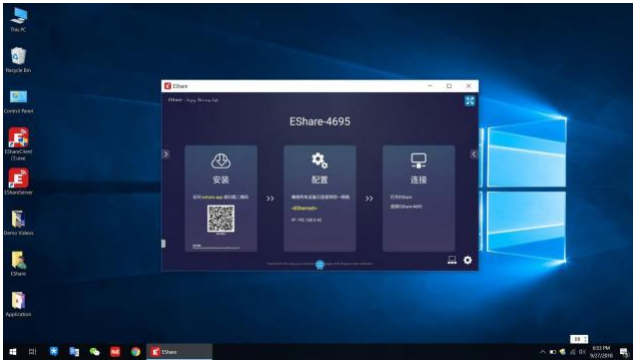

Next, select the device name you plan to connect to and click *Screen Sharing* to share Windows/Mac screen to your Interactive Touchscreen/TV.

# Guide for Windows/Mac Computers (continued)

## TV Mirror

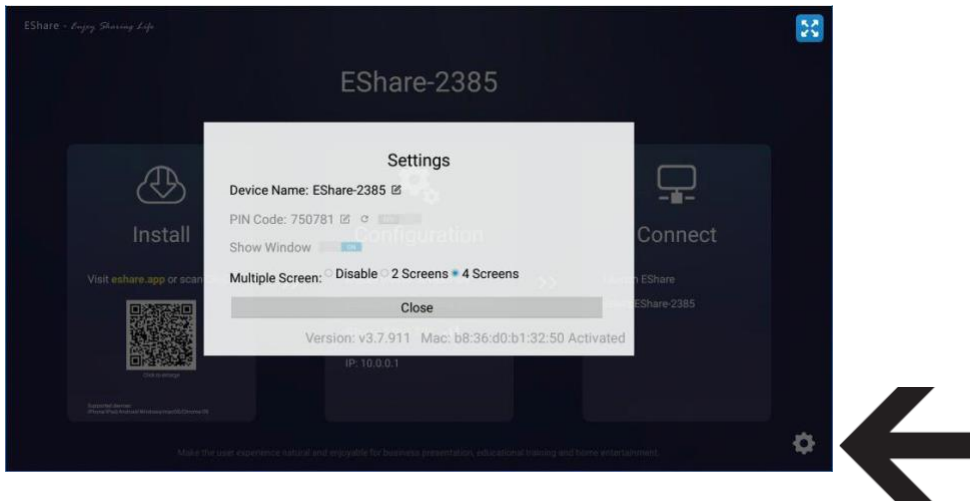

Click *TV Mirror* to mirror the Interactive Touchscreen/TV screen to the Windows/Mac computer, and you can control the Interactive Touchscreen/TV via Windows or Mac computer.

# Guide For MultiScreens

## MultiScreen Settings

Launch EShare Server on Interactive Touchscreen/TV and click the cog icon (bottom right) to bring up the *Settings* menu where you will be able to select multi-screens.

## MultiScreens

Ensure that your client device and the Interactive Touchscreen/TV are connected on the same network. Then launch the *EShare App* on your device and wait for a list to display Interactive Touchscreen/TV device names.

Next, select the device name and click *Screen Sharing*. Multiple screens can be cast to the Interactive Touchscreen/TV, the screen of which will be split automatically.

A variety of operating systems (Mac/Win/iOS/Android/Chrome) can all be cast to the Interactive Touchscreen/TV.

# Guide For MultiScreens (continued)

## Select Audio Output Channel

The audio of last casted device will be output by default from your Interactive Touchscreen/TV on multi-screen mode.

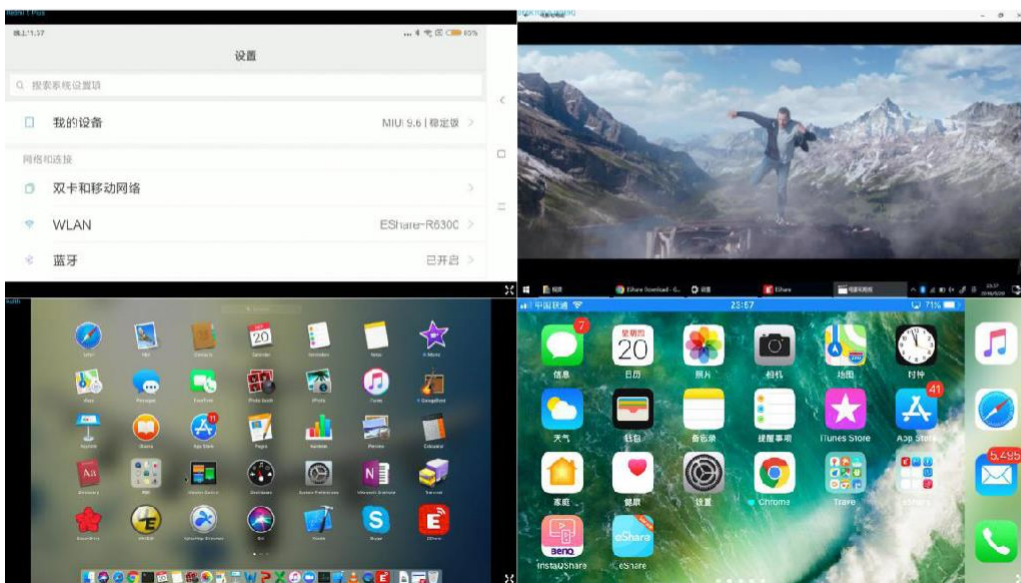

You can click one of the split screens on the Interactive Touchscreen/TV to select the preferred audio output channel.

## Full Screen Or MultiScreen

Click on the *Full Screen* icon at the Interactive Touchscreen/TV bottom right corner on multi-screen mode to display full screen.

Click the icon again on full-screen mode to go back to multi-screen mode.

# Display Groups

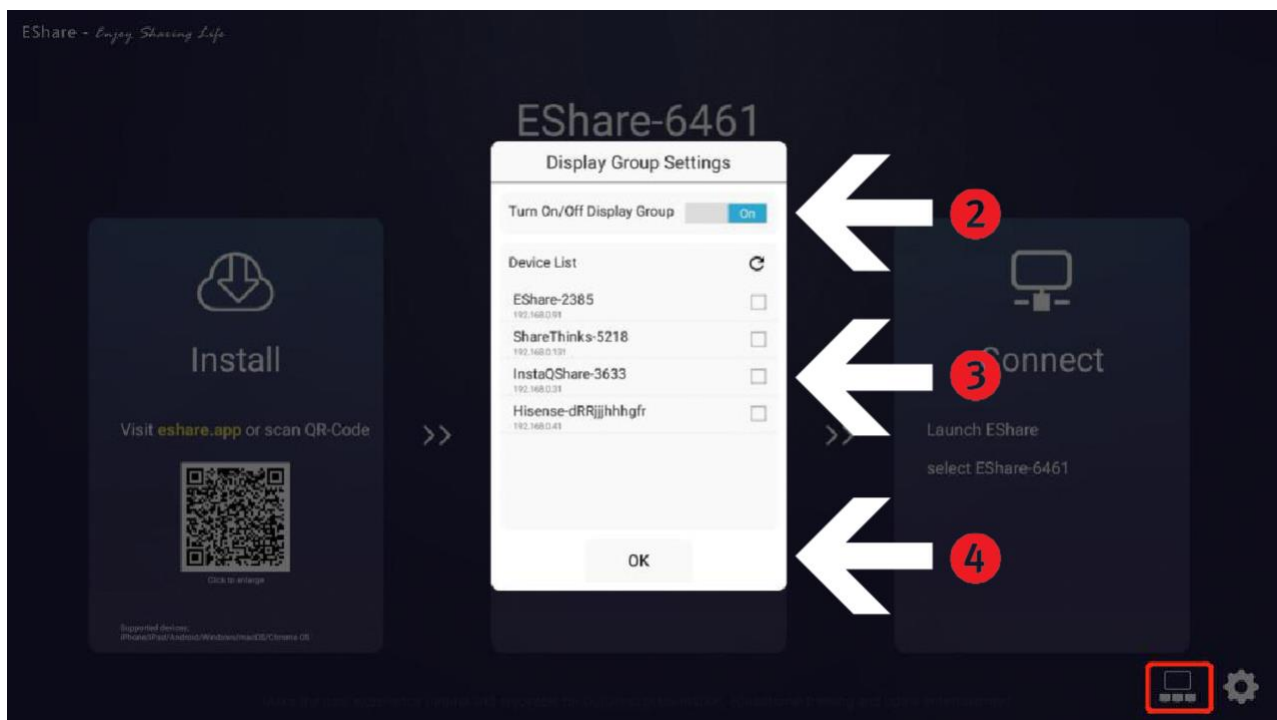

## Display Group Settings

Launch the *EShare Server* on your Interactive Touchscreen/TV and...

1. Click the *Screen Group* icon (bottom right) to enter the setting interface.
2. Click the switch icon *Turn on/off Display Group* to *on* and the Interactive Touchscreen/TV device names will be displayed in the device list (if the Interactive

Touchscreen/TVs are installed with *EShare Server* and on the same network).

3. Select the *Device Name(s)* you plan to set up as a *Display Group*, and click "OK" to end the settings.
4. The multi-screen mode will be disabled by default if the display group is enabled.

## Guide For Display Groups

After doing the above, connect any *EShare* device (iOS/Mac OS/Win/Android/Chrome OS) to the main Interactive Touchscreen/TV, thus enabling *Mirroring* and casting the main Interactive Touchscreen/TV to the selected multiple Interactive Touchscreen/TVs.
